

More than dots on the net

ECLID

European Cultural & Linguistic
Internet Domains

How well do you know cTLDs and overarching issues?

1. What cultures do new cTLDs initiatives want to represent?
 a) Galician b) Welsh c) Icannese
 d) Basque e) Scottish f) Breton

2. What is the name of the only existing cTLD (for the time being)?
 a) dotDOG b) dotCAT c) dotBAT

3. Which of the following is not an "overarching issue"?
 a) Trademark protection
 b) Brussels meeting coinciding with World Cup
 c) Malicious conduct

4. Has .cat caused any problem regarding Trademark, potential malicious conduct and DNS security?
 a) Yes b) No

5. Will further delays in the new gTLD process cause problems for cTLD bids?
 a) Yes - we'll keep on working hard, but we are volunteer-based projects and delays are challenging
 b) Yes - we are not-for-profit projects and do not have limitless funds
 c) Both of the above

Got the answers right? Then you'll understand why "overarching" doesn't exist in our dictionaries.

dotBZH, dotCYM, dotEUS, dotGAL and dotSCOT will be managed with restricted policies, so we won't even hear of overarching issues.

Take a look at dotCAT's model: great results. Let our languages and cultures have their own names on the net.

Answers:
 1 a), b) d) e) and f) are correct. c) might be one of the applications, who knows!
 2. b)
 3. a), c) and yes, b) is also correct
 4. b)
 5. c)
